SLIPSTREAM // 78M NAUTA DESIGN

Slipstream is Nauta Design's latest 78.4-metre superyacht concept which has been developed for construction bidding purposes. A state-of-the-art stern walkway is formed by the port and starboard terraces and connects to the beach club where a large bar area and 'nemo' lounge with glass that descends below the waterline are situated. A sea-water swimming pool has been integrated into the stern platform which is able to close flush with the deck to provide her 12 guests with abundant outdoor space. The upper deck is dedicated to the owner, providing them with direct access to the helipad and a private foredeck which features a jacuzzi pool and 'infinity nest'.
